CEMENTEC
READY TO USE

MICROCEMENT READY TO USE
BY
TECNOCEMENTO®

WHAT IS CEMENTEC?

CEMENTEC is an state-of-the-art microcement ready to use range. It is one of the most demanding coatings to get a suggestive, personal and distinctive touch of design. Thanks to its easy application, without the need of previous experience, and the reduction of preparation times, it saves time and money. CEMENTEC applications allow the renovation and remodelling of spaces without the need of demolition nor creating debris, being faster and cleaner than other coatings (tiles, marble, wood, etc.), by not creating dust in its installation stages.

WHY CEMENTEC?

Because **it is ready to use** and:

- **Easy.** Directly weighted, measured and mixed.
- **Clean.** No dust cloud.
- **Intuitive.** NO need for training courses and special skills.
- **Reliable.** Product manufactured under strict quality protocols.
- **Complete.** Diversity of products and colors.

WHERE IS APPLIED?

This is one of the best advantages that microcement offers. It is a product suitable to apply on all type of supports and areas, both renovations and new building constructions. Most applied areas are usually bathrooms, showers, kitchens, stairs, furniture, housing and also commercial premises like shops, restaurants or general public areas.

PURE CEMENTEC

CEMENTEC STANDARD

CEMENTEC STANDARD system can be used both on interior walls and floors, which are in optimal condition to be coated, reaching a smooth and continuous aesthetic. It is one of our most requested application systems due to its easy application and excellent result. Kitchens and bathrooms can be coated with CEMENTEC STANDARD as long as it is protected with our FINISH FORTE PLUS, a 100% waterproof and chemical resistance polyurethane. It can be applied on almost all type of supports (tiles, marble, concrete, plasterboard, etc.) although a prior surface adaptation must be carried out where microcement is going to be applied.

Includes:

- **Microcement Base**
- **Microcement Fino Standard + Pigment**
- **Primer**
- **Finish Forte or Finish Forte Plus**

And, also:

- Metallic trowel and spatula.
- Plastic pail.
- Microfiber roller and brush.

PURE CEMENTEC

CEMENTEC TEXTURE

Unique system on ready-to-use coatings market with a textured aesthetic. This means that it has same appearance than traditional 2-component microcement. It can be applied on

interior walls and floors with marked and/or textured look.

Extraordinary application system due to its excellence visual relevance. Easy to apply and with an unmatched result.

Kitchens and bathrooms can be coated with CEMENTEC TEXTURE as long as it is protected with our FINISH FORTE PLUS, a 100% waterproof and chemical resistance polyurethane, in different shades. It must always be taken a proper adaptation of the supports where the system is going to be applied. Never apply any of our systems directly

on a support that has not been reviewed and repaired. Applicable on tiles, marble, concrete, plaster, etc.

TEXTURIZED
COLOR

Includes:

- **Microcement Base**
- **Microcement Fino Texture + Pigment**
- **Primer**
- **Finish Forte or Finish Forte Plus**

And, also:

- Metallic trowel and spatula.
- Plastic pail.
- Microfiber roller and brush.

PURE CEMENTEC

CEMENTEC VINTAGE

Get that “retro” result with the application of this system

through a simple “mopping”. A vertical parament that looks like an “Old wall”, a floor in “Cinder” color, or a bathroom in “Winter Sea”, these are some of the many colors that we can

offer you.

Being applied on both interior walls and floors achieving a more textured and/or marked aesthetic. Besides, you can also apply this system in wet areas of

your home, with the use of FINISH FORTE PLUS, a varnish based on polyurethane with high chemical resistance and impermeability of 100%.

Keep in mind to previously adapt the prior supports where you are going to apply this system, and do not apply it directly.

An inspection and adaptation of prior supports is always necessary.

Includes:

- **Microcement Base**
- **Microcement Fino Texture**
- **Primer**
- **Vintage color selected.**
- **Finish Forte or Finish Forte Plus**

And, also:

- Metallic trowel and spatula.
- Plastic pail.
- Microfiber roller and brush.

AGED TEXTURE

MEDIUM RESISTANCE CEMENTEC MEDIUM

We offer our MEDIUM RESISTANCE range which has slightly stronger resistances than PURE

CEMENTEC. Thicker aggregates + extra additives make up CEMENTEC MEDIUM.

Coating designed for those areas with medium-low pedestrian traffic. Furthermore, thanks to its selected aggregates,

provides anti-slip properties (prevent slipping) making it suitable for interior (home) and exterior floors

(terraces, shower trays, etc.). In addition, it can be applied on vertical paraments to give them a rougher and plain appearance.

Includes:

- **Microcement Base**
- **Microcement Medium + Pigment**
- **Primer**
- **Finish Forte Plus**

And, also:

- Metallic trowel and spatula.
- Plastic pail.
- Microfiber roller and brush.

EXTREME CEMENTEC

CEMENTEC HIGH TRANSIT

The NEW development of CEMENTEC, an acrylic-based system resistant to medium-high pedestrian traffic. This feature is reached adding a polyurethane-based catalyst.

Possibility of plain aesthetics (Standard) or textured (Texture). In addition, it is a solvent and epoxy resins-free product. Easy to apply due to its thixotropic components, being suitable for interior floors that may suffer medium-high pedestrian traffic (private offices, building hallways, etc.).

Includes:

- **Microcement Base + HT Catalyst**
- **Microcement Fino + Pigment + HT Catalyst**
- **Primer**
- **Finish Forte Plus**

And, also:

- Metallic trowel and spatula.
- Plastic pail.
- Microfiber roller and brush.

EXTREME CEMENTEC

CEMENTEC EXTREME

The last development of CEMENTEC, a line of products capable to resist high pedestrian traffic and light hand machinery. CEMENTEC EXTREME application system is suitable for interior and exterior areas that can be circulated by high pedestrian traffic, as well as small movement of light hand machinery. It is a product with maximum surface hardness and wear resistance.

Furthermore, its combination with FINISH FORTE PLUS makes it the most complete coating in our range of products. Combines surface hardness, waterproof and chemical agents, along with a smooth and plain aesthetic appearance, for those who love continuous colors. Despite what it may seem, its application is very simple and has few steps to obtain

a satisfactory result. It is important that the prior support which is going to be coated is in good condition, perfectly anchored to the underlays and free of loose particles.

Includes:

- **Microcement Base Extreme**
- **Microcement Fino Extreme**
- **Primer**
- **Finish Forte Plus**

And, also:

- Metallic trowel and spatula.
- Plastic pail.
- Microfiber roller and brush.

TYPES OF TOP COATINGS

PRIMER

One component acrylic sealer

Application 1 layer of Primer + 20% with water, using a short-hair microfiber roller and brush. Presealer to seal the microcement. Product consumption approx 0,05 L/ sqm/layer.

FINISH NATURAL

2-components and water-based varnish

Application 1 layer of Primer + 2 layers of FINISH NATURAL, using a short-hair microfiber roller and brush. Silky and natural touch which highlight the microcemento look. Product consumption approx. 0,05 L/ sqm/layer.

FINISH FORTE

2-components and polyurethane varnish.

Application 1 layer of PRIMER + 2 layers of FINISH FORTE, using a short-hair microfiber roller and brush. Smooth touch for the superficial protection of microcement. Product consumption approx 0,05 L/sqm/layer.

FINISH FORTE PLUS

Polyurethane varnish 100% waterproof

Application 1 layer of PRIMER + 2 layers of FINISH FORTE PLUS, using a short-hair microfiber roller and brush. Durable and chemical products resistant, which highlight the microcement look. Product consumption approx. 0,05 L/m²/layer.

PRIOR SURFACE PREPARATION PRODUCTS

CONSOLIDADOR

Priming product used to consolidate surface and provide adherence. It is a one-component, solvent-free product.

SEAL

2-component epoxy priming product to regularize absorption of the materials applied on the same support.

CONSOLIDADOR FORTE

1-component adherence promoter product for continuous supports (without joints) that are highly disaggregated.

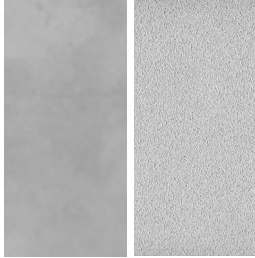

FIBERGLASS MESH

Very light type E fiberglass mesh to reinforce Cementec systems. It has alkaline protection.
